CIR Update and June 06 Special Offer

Dear Friends and Customers,

As May is drawing to a close, we are writing to you again to keep you informed of news and special offers from CIR. It is nearly nine years ago that we started our work from our garage at home. Over 5000 Vortex Energisers and many more Harmonisers have been hand made and sold during this time. We wish to thank all of you who have supported us with our work.

In November last year we introduced the first (Iceni Wrist Torcs) of our new Ancient Sources product collection. In February we added the Boudicca Wrist and Neck Torcs. The feed back we've had has been very encouraging. People are very excited about these ancient, beautiful designs, with the added benefit of Imploded Water. Further exciting designs are in the pipe-line—we'll keep you informed.

We are delighted to introduce Eric Huurre, our friend and Canadian distributor, who has been very familiar with our products for the past four years. Eric has an extensive background in film production and marketing and embraces our CIR philosophy. He has agreed to assist us in his capacity as a marketing consultant to take the Ancient Sources collection to a wider market. As a first step, we have now got a dedicated website, www.ancientsources.com, which we will build up over the summer months.

We'd also like to announce that Eric is in the process of setting up an expanded CIR Internet "Community" and other information features for both distributors and customers. The aim here is to share information, experiences, etc.

As our Personal Harmonisers are ancient designs, we have

decided to move them across to the Ancient Sources collection, which means that in future all those CIR products which have a jewellery aspect will be available through the Ancient Sources collection. The Vortex Energisers, EMF Harmonisers, Computer & Mobile Phone Harmonisers, Vortex Sculpture and copper PHI Harmonisers will continue to be available through the CIR Product range. Please bear with us while we are in this transitional phase.

We are happy to announce the three winners of our Christmas draw: 1st prize: Linda Crook, Bristol—2nd prize: Hitomi Horiuchi, Japan—3rd prize: Paul Jenkins, Hampshire.

Finally, we have a fantastic special offer for the month of June only, including many free products. Please see separate Special Offer sheets.

Wishing you a warmer summer.

The CIR Team

The following testimonial came to us via Michael King, Oregon, USA

On the first day of wearing the personal harmoniser I felt my heart open up. The next day I began going through a detox, experiencing a headache at first, followed by a day or two of feeling as if a new internal orientation was forming within. By the third or fourth day of wearing the Personal Harmoniser I began to feel more empowered, more myself, and more balanced. Thank you for providing the world with such a wonderful, life-changing product. Barbara Walker, Oregon, USA

The following testimonial came to us via Eric Huurre, earthHeal Canada:

Hello earthHeal,

In the middle of June, the pool company opened my in ground swimming pool as they do each year. At the time of opening they added shock and some algacide to the water which had remained in the pool during the winter months. I then added sufficient water (approx. 9,000 litres) to fill the 12,000 litre pool.

However, since I had recently purchased a Vortex Energizer, once the pool was filled I attached the energizer to a long shoe string and submerged it. I then walked around the perimeter of the pool three or four times with the energizer trailing in the water beside me. Finally, I attached the shoe string to the ladder of the pool and left the energizer dangling in the pool water.

Two weeks later, the water remained absolutely clear and we began to swim. The lack of chemical smell was apparent as I had added no bromine or other chemicals.

Normally, upon opening the pool I take a water sample into the pool store, where it is tested. They then provide me with a variety of chemicals to add so that the water is balanced and I can begin the weekly addition of bromine and 'clear'. It is not unusual to add many pounds of chemicals following the first water test.

This year, one month after introducing the energizer to the pool, I took a water sample into the pool store. Apart from the initial shock and algacide, no chemicals had been added to the water. I was informed that the water was 'perfect' and that the chemical balance was fine. I asked specifically about the alkalinity level and was told that it was fine. I indicated that the at-home test strips indicated a 'zero' level for alkalinity and that indeed I had not yet added any. I was informed that the test strips must not be accurate since they were from the previous year and that obviously sufficient chemicals had been introduced to the water. I decided not to argue and to simply continue to enjoy my sparkling clean, chemical free pool.

I recently purchased a second Energizer so that one can remain by the pool and outdoor hot tub and the other can remain on the water system in the house. ~ P.C., Wiarton, Ontario, Canada

Boudicca Wrist Torc

Ancient Sources collection is inspired by the combination of reviving ancient art forms (that objectify traditional knowledge and wisdom) and the universal truth of water as a sacred life force.

These beautiful hand-crafted quality products continue and transform the ancient traditions

of amulets - symbolic and beneficial jewellery. We have created timeless jewellery filled with CIR Imploded Water.

Torcs are metal rings that are worn around the neck, arms, wrists or ankles. They are found variously in the archaeological record, and are perhaps most well known in the British Isles as being popular amongst the Celtic Peoples e.g. The Icenii (South-East England). Historical testimonies from the Roman legions described Celtic warriors going boldly into battle wearing nothing but their torcs. Boudicca, queen of the Icenii, famous for her bravery against the Roman invaders (AD 62) reportedly wore neck torcs. Torcs have come to represent powerful tribal objects.

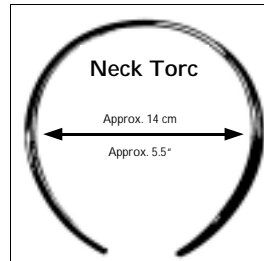

Torcs come in several forms. Some are simply made from fine hollow tubing (**Icenii**); others are constructed from intertwined metal strands (**Boudicca**). Neck torcs are worn loosely around the neck either with the terminals pointing towards the back or resting on the chest. The 15" length is a standard measurement to fit most people. The wrist Torc comes in two sizes: Large is unisex, the small size fits most women and children. Torcs have some "spring" and are designed to ease open and adjust according to the individual. Customised sizes for all Torcs can be made on request.

NEW: The copper Icenii Wrist and Neck Torcs are now also

available with optional bead terminals (surcharge: £2.00-£2.35 incl. VAT), which are especially popular with men. They can be supplied with either brass or silver-plated beads, which have a striking 2-tone effect. Please indicate your preference on order form.

Icenii Wrist Torc with bead terminal

Neck Torc

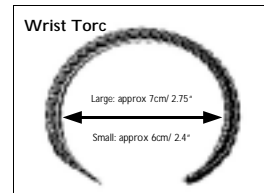

Icenii Neck Torc™
Size: 38cm / 15" overall length.

Icenii Wrist Torc™
Approx. size: Large 7cm width. Small 6cm width.
