## CIR Update and June 07 Special Offer

Dear Friends and Customers,

Many of you have been eagerly awaiting our June Newsletter and Special Offer. We wish to thank each and everyone of you for your loyal support! This year we have been very busy promoting Ancient Sources, our water-filled jewellery collection. We have attended three trade shows, the Spring Fair in Birmingham, the Natural & Organic Products and the Museums & Heritage Shows in London.

The most frequently asked question was 'why put water in jewellery?'

We explained that water is the most important substance for life on this planet; living beings are made up of large amounts of water; and that CIR has been developing technologies for the past 10 years, which are based on bringing water back to its natural healthy state.

We talked about how water needs to move in its natural spiralling, meandering way to stay healthy and disease free; that energy is transferred through vibration and resonance; and that water has the ability to store and transmit information.

We then explained that where our imploded water is held in copper spirals and curving forms, its energetic charge and qualities are transferred to the wearer via resonance.

We continued to explain that our pieces of jewellery actually follow an age old tradition of meaningful jewellery: amulets which adorn and empower. In today's context, our jewellery boosts our own energy field and natural defences against (for example) the continuous onslaught of electromagnetic pollution.

Attending these shows gave us an opportunity to tell many people about the importance of water and about our work.

For many years we have been thinking of doing our own silver and gold plating. This dream is about to become a reality. Over the last few weeks we have been preparing our workshop to house the new plating station arriving at the end of May. We are very excited about being able to plate in-house. It means we will be more flexible in future with our plating options and special requests.

We are delighted to announce the winners of our Christmas draw: The first prize of one Water Egg went to Olivia Moody from Newcastle upon Tyne; the second prize of one silver-plated EMF Harmoniser went to Berthe Clark-Hutchinson from Scotland; the third prize of an Ancient Sources pendant which has not been claimed as yet to Malcolm Whalan of West Yorkshire (Malcolm, if you read this newsletter, please get in touch).

On the reverse of this page is a selection of customer testimonials.

**Finally, the special offer for the month of June is 10% discount on retail and wholesales prices of all CIR/Ancient Sources products.**

With best wishes for a glorious summer.

The CIR/Ancient Sources Team

Our busy stall at the Natural and Organic Product Show, Olympia, London

**Here are some recent testimonials:**

"Having used your harmoniser for many years, I would like to say how I came to use them and why I continue to do so. Our son had bought a personal harmoniser at a talk by one of your team, at Glastonbury and I used it on my glass of water. The difference was very obvious so I sent for my own. From this beginning we added periodically, until we now have; a Vortex Energiser on our water supply, personal harmonisers in the fridge, on the T.V., radio, microwave oven and computer, under the fruit bowl, attached to water bottles for cut flowers and also for pot plants. I have one attached to a small spray bottle of water for when I do rubber stamping—I have used the same water for over a month and it still smells fresh. I always have a harmoniser in my purse for drinks in café's etc. Needless to say I wear one permanently. Cut flowers stay fresh longer now and food in the fridge lasts longer. Our water tastes very good (previously it was poor, even when filtered) and a room spray I make with half a pint of water and one drop of lavender essential oil (given a sharp knock as in homeopathic mixes) stays fresh, with a strong scent, until the last spray. I am very pleased I learned about your implosion research!"  
Maureen Stone

"I have worn a personal harmoniser for many years. I first wore it low in front of my Solar Plexus. It protected me from what were often fragmented and disturbing energies in the small town I live in. It helped a LOT. It's also very attractive and often admired in its lovely silver coating. I then bought a second one for my water jug to stand overnight with the harmoniser. My tap water is not nice, and bottled water tastes dead, the harmoniser transforms it completely. It's so soft, has a good taste and most people comment on how good it tastes—PLUS all the nasty, harmful chemicals are removed too [*we don't make any claims to that effect, CIR*]  
Last year a relation had cancer and Dolly suggested a triple harmoniser with a crystal and I gifted one of my harmonisers for the water jug. It was a very challenging time and a long process, but it's over and all clear and I feel 101% that it helped, both by getting good water to drink that has its natural life force energies AND wearing the harmoniser to balance out harmful bodily energies from the chemotherapy.  
Thank You for your help and for your dedication to your work."  
Pauline, Somerset.

"I received my order in record time, less than a week to SW USA, Thank you.  
The free phi harmonizer has been a real hit with friends and family. They were amazed when it took away the discomfort from a dental procedure and back ache in a matter of minutes. Then the transformation of a nervous nelly dog into a calm one, after wearing the harmonizer for a bit.  
Thank you ever so much for your products. We love them."  
Susan

"There are a lot of 'harmonisers' available on the market now in North America and they are getting quite popular, but we find that they are not coming close to your Phi Harmonisers!"  
M & B, Canada

"The energiser is a great success. Tap water changes to something sweet and eminently drinkable, though I have to leave it to stand or put it through a filter to get rid of the chlorine. My companion was amazed at the improvement in flavour and a friend at the Wessex Dowsers, a scientist and engineer, declared that he had given water treated by the Vortex energiser to some people who asked where he got the lovely water. 'I told them it was out of the tap,' he said... With my sensitivity to such matters could feel the EMF Harmoniser calm the vibrations of the room instantly..."  
Joe Potts

"I was one of the many people that came up to have a chat at the Natural Products show.

I bought a copper water vortex energiser from you that day and have already noticed a subtle taste enhancement in my drinking water.

I also said that I'd be happy to give a testimonial for the silver 4 spiral personal harmoniser that I've been using.

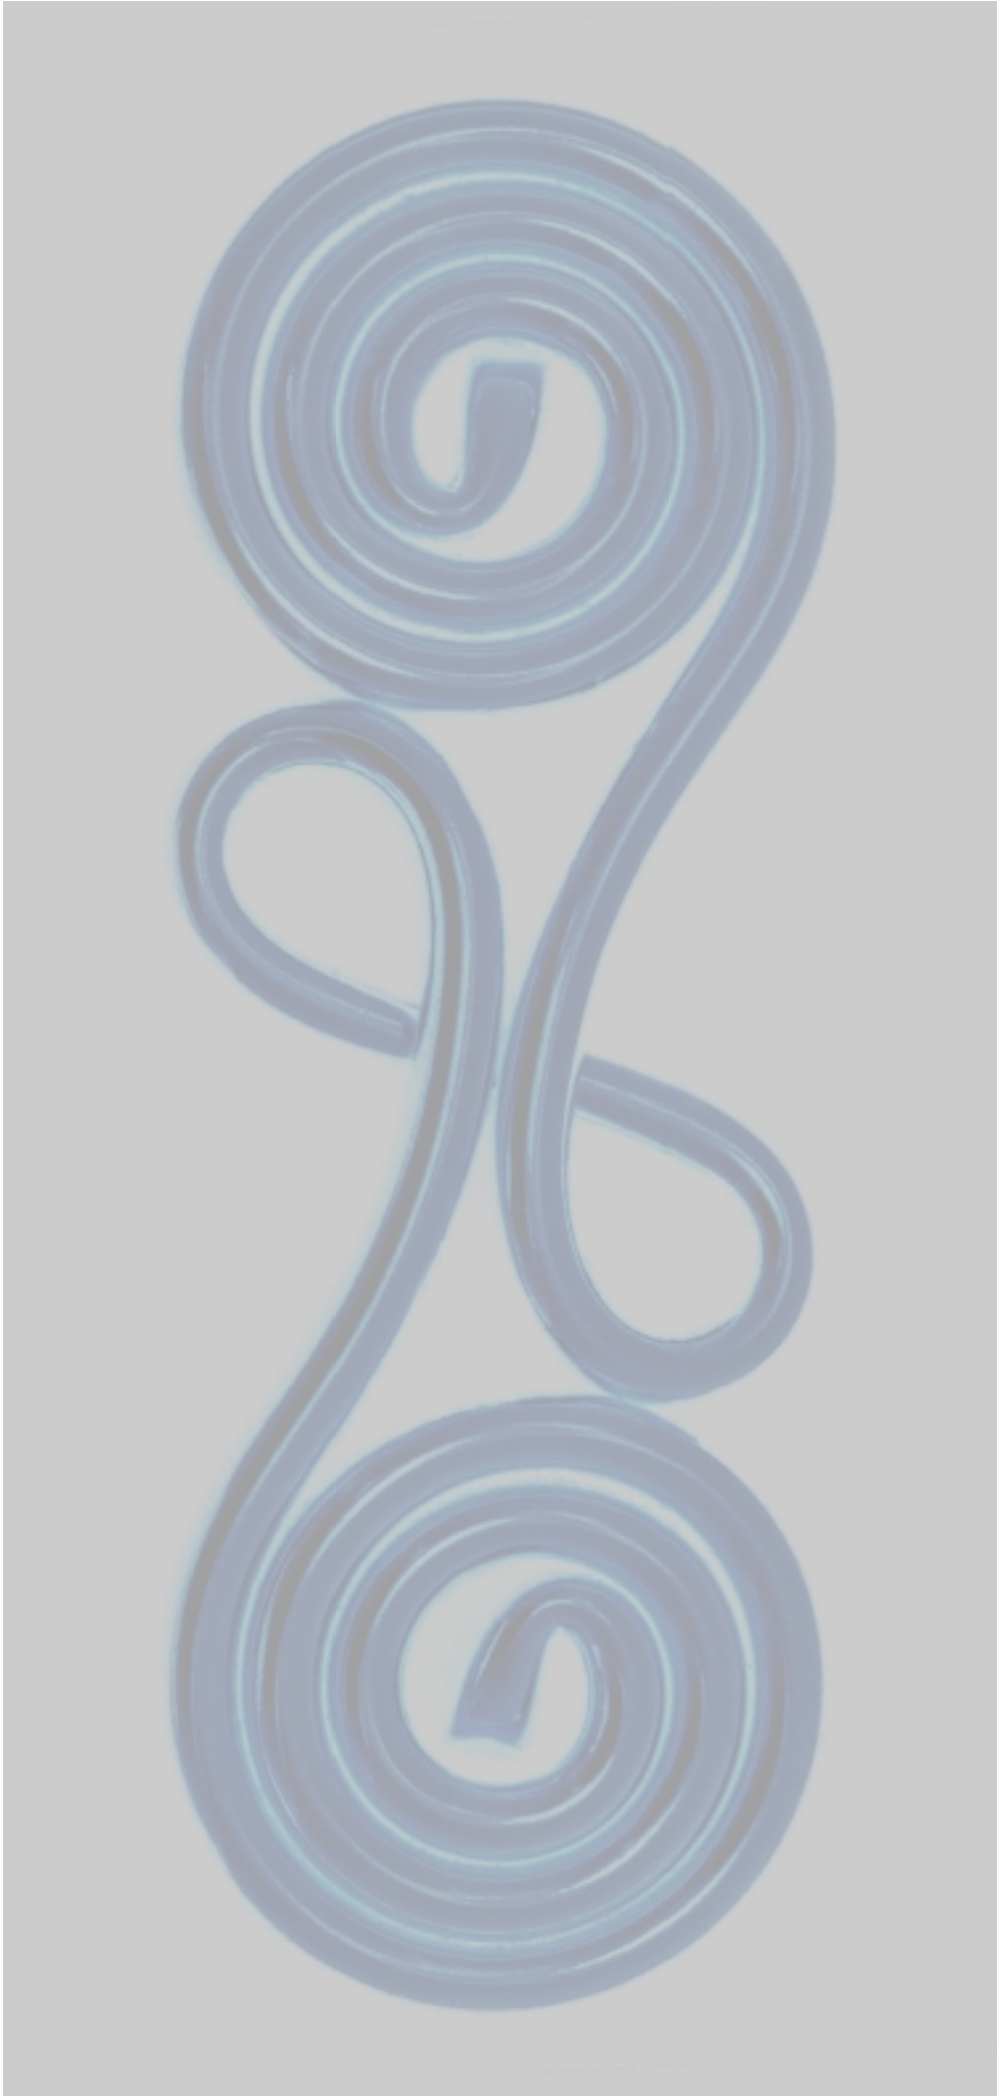

I have been using a silver 4 spiral personal harmoniser for about a year now. I had trialled other personal energy devices and the reason I chose this one was for the following reasons:

1. I trialled a couple of personal devices – in one case I and other energy therapist colleagues of mine found that this other device actually reduced our energy vibration! It seems that not all devices are able to cope with the different bio-energy field energy therapy practitioners seem to generate. The 4 spiral personal harmoniser was a device I found to actually increase my vibrational energy levels, which I determined by "energetically" interacting with it. I feel better with it on.
2. From my personal experiences and energy therapy practice I thought the underlying principles of the water acting as an "energetic" tuning fork for a healthy bio-energy system made sense to me.

I was intuitively drawn to this product.

I'd like to thank you for bringing such a product to market!"
