CIR Update and May Special Offer

Dear Friends and Customers,

We hope the new year so far has been a good one for you. We have decided to bring forward our early summer newsletter and special offer this year. Hopefully it will be well received.

First, we'd like to thank you all for your continued custom and support throughout the winter. So many of you made use of our Christmas offer and we are happy to announce the three winners in our Christmas prize draw. They were:

- 1st prize: 1 Water Egg—Paul Kennison
- 2nd prize: 1 small EMF Harmoniser—Miss J. Cant
- 3rd prize: 1 copper Four-Spiral—Raj Venathiathan

Congratulations to the lucky winners.

For many years we've been thinking of platinum plating our products. Eventually this year we managed to locate a company that does platinum plating and had some samples done. We were transfixed by the result. At first glance, platinum looks similar to silver, but darker. Then one becomes aware of its amazingly deep shine and lustre. We have been wearing a platinum plated Personal Harmoniser

for a little while now and are very taken by its understated appearance. Our platers assure us that platinum is extremely hard wearing and durable.

It is early days to write about its energetic effects, but for now please refer to the quoted passage from "Love is in the Earth", the reference book describing the metaphysical properties of the mineral kingdom.

In this newsletter we are also bringing to you two interesting testimonials from our distributor friends Philippa Gerry and Carl Agar. Please turn over for details of our special offer of two Vortex Sculptures and information on paramagnetic soil & rock-dust testing.

Wishing you all a wonderful summer,
Your CIR team

Platinum

"This mineral can be used to balance the centres and meridians of the physical body, to provide alignment of the physical body to the etheric body, (...) and to facilitate the maintenance of optimum health. It can also provide permanence to relationships, stimulating self-approval and, hence, facilitating non-judgmental attitudes toward another.

Platinum maintains ones energy level to enhance the accomplishment and completion of goals. It has been used to stimulate the pineal gland and has enhanced ones intuition, psychic abilities, and awareness of other levels of intelligence. (...)

It can be used to stimulate the health of the eyes (...). Platinum also provides for a connection with the cellular structure of the physical body and activates, in the memory of each cell, the recognition of the healthy condition (...). It also assists in the proper functioning of the digestive tract, and in the better assimilation of nutrients." (Love is in the Earth)

Carl Agar from Australia sent us this story recently:

"Twelve months ago we had a family friend come to visit and he told of his recent trip to the doctor and about his problems with diabetes, it had got to the point where he was having trouble healing cuts on his feet, was losing feeling in his feet and often had sharp pains in his legs, all apparently due to poor circulation.

We gave him a tri-mental personal harmoniser to wear. Generally he felt better but it wasn't until he went on holiday that he realised how much better he had been feeling. One night he had a restless sleep and was up early in the morning with sharp pains in his legs, which he hadn't experienced for a couple of months, later that morning he realised that it was the first time he had left his personal harmoniser off; he had taken it off the previous day and left it in the bathroom. He put it back on and within one hour felt back to normal. When he got back from holiday he went to the doctor for his check-up and found that his blood sugar levels were close to normal and the lowest they had been for 2-3 years.

When relating this story to us he proudly showed us his feet, he had feeling back in them, no problems with healing and was feeling fit and energetic and swears by the personal harmoniser as the simplest and best investment in his health he has ever made."

Special Offer: For the whole month of May 2005 we are offering a 10% introductory discount on the new platinum plated versions of our double, triple and four-spiral Personal Harmonisers. Please see special offer sheet for details.

Philippa Gerry from Minehead wrote to us recently:

"For years I've had to be a hermit, avoiding—where possible—any electropollution: TVs, digital radio, videos, faxes, computer, microwave ovens, radar (boats, trains, church hearing loops etc.), people's cars with electronic gadgets; the electric wiring round my bed disconnected; a fear, amounting to phobia, of being near mobile phones. The invisible electronic "smog" we all live in gets thicker by the year. Now there are mobile phone masts sprouting, and the police Tetra masts all over Somerset, planned for the whole country. Very big energy fields.

Lucky me: someone more afflicted than I, and knowledgeable, warned me. I borrowed books. Scary. You can't see or feel or hear this disruptive manmade energy, only know something is going wrong. Mounting problems, few solutions—magnets, screening.

For the estimated three million (and rising) people in this country affected like me, there is good news. At the Centre for Implosion Research. Since putting on one (and sometimes two) of their PERSONAL HARMONISERS on 12.1.05, I've been able to go almost anywhere without the previous symptoms, I'm not affected at all by e.g. the builder's mobile, the bank's computer, the radiation (I measured it with an Acousticom from The Healthy House) from the upstairs flat's portable phone base station. I can listen to digital radio with a small harmoniser on it. I could get a TV, go on a bus, go to the theatre, again. Energy is up, walking 6 miles instead of only two, aged 73 with a bad foot.

There are harmonisers on me, on the walls where the radiation comes down, on the windows where radiation comes in (we're not far as the crow flies from Hinkley Point, a nuclear power station), and there is a Vortex Energiser on my cold water supply. This "wipes" the water's memory of anything that has gone into it, e.g. agrochemicals, peoples' drugs. In London, we are told that water has been recycled at least 25 times. As all my water for cooking and eating is energised, it can only be good; cut flowers seem to last twice as long in it, and maybe I shall, too.

A friend has put a pet-size harmoniser on the collar of her amiable old lethargic collie, which is now a frisky dog again, greeting the postman energetically; should we get him one, too? Animals are as much affected by radiation as people."

Paramagnetic Soil/rock-dust tests

You might recollect reading in our literature about Dr. Phil Callahan, his Schumann wave research and the measurements he took with our products.

Another very important area of his work is "paramagnetism/diamagnetism" and how this affects soil fertility. These terms are expressions of magnetic susceptibility. Phil discovered that as all plants are diamagnetic they require paramagnetic soil in order to have the right stimulation for healthy growth. Paramagnetism and diamagnetism are thus the yin and yang of agriculture. According to Phil it is due to the highly paramagnetic nature of some (especially volcanic) rocks that plants can grow in rock crevices in the total absence of soil and nutrients. Please read "Paramagnetism—Rediscovering Nature's Secret Force of Growth" by Phil Callahan to find out more.

Several years ago we bought a Phil Callahan Soil Meter, a device which measures the magnetic susceptibility (in CGS) of soil and rock-dust samples. Over the years it has seen only

infrequent use. We thought this is a shame and would like to encourage customers to experiment with "Nature's Secret Force of Growth" and to offer a testing service. Whether you are a farmer, horticulturalist, or just enjoy growing vegetables in your garden or allotment, you might be interested to send us a soil sample. We would then send you a report with the results and what it means. If your soil has a low paramagnetic value you could improve it by adding paramagnetic rock dust to it, which you could possibly obtain from your local quarry. We will give you guidance on what rock-dust to choose.

If you would like us to do a test for you, just send us your soil sample in a plastic photographic film container, enclosing payment for £30 (£35.25 incl. VAT).

Discounted Vortex Sculptures

For several years we have been making the Vortex Sculpture, a 6 ft large version of the Vortex Energiser, filled with imploded water. It makes a spectacular sculpture with far reaching energetic effects. As an energetic landscape feature it would adorn gardens, parks, forecourts, town squares, etc. It can also be incorporated into water features.

The Vortex Sculptures require specially commissioned copper tubing and are made to order. It so happens, that the last customer who ordered three sculptures only took one in the end. This means that we currently have one sculpture, which is partially made and another which has yet to be started. We are keen to find good homes for these two sculptures and have decided to offer them at a substantially reduced price for our May Special Offer. Whilst the regular price is £5000 (£5875 incl. VAT), we are happy to accept £3500 (£4112.50 incl. VAT) each for these two sculptures. They will be sold on a first come, first serve basis.

Shipping to locations abroad can be arranged.
